

## AUSTASIA PACKAGING OFFERS CUSTOM PIZZA BOXES

Founded in 2001, Austasia is a 100% Australian owned company serving the food industry for its packaging requirements. They are driven by "Understanding, creating and delivering Value" for their customers.

As a diversified packaging company Austasia manufactures and supplies various packaging products for the food industry in Australia. They collaborate with several packaging companies around the globe to develop and offer products to our customers that are of genuine value.

Austasia products adhere to internationally recognised food safety standards and quality control guidelines. Their products are made from various materials including aluminium, plastic, paper and foam. Some of these are:

- Aluminium containers
- Foil rolls
- Cling wraps
- Plastic containers
- Pizza boxes
- Aluminium lined paper bags (Kebab and Chicken bags)
- Cups

WaiterMate comprises of a number of individual functions, which belong to one of four module which can be easily tailored to your venue's requirements.

## SPYRAL OFFERS THE BEST FRYER IN THE WORLD

Pitco is well known in the industry for its high efficiency fryers and their new series is no exception. The Solstice Supreme, a major breakthrough in fryer design, has the highest gas efficiency rating and the lowest cost of ownership in the industry.

Solstice Supreme's smart simple design eliminates all of the failure prone moving parts found in older high efficiency fryers. Pitco also offers automatic self-cleaning burners (patent pending). A 30 second automatic self cleaning burner procedure is triggered with the matchless ignition system, ensuring burners stay clean all day, every day, providing optimal burner efficiency.

And of course, all Solstice Supreme fryers incorporate Pitco's standard 'No Blower' design. The new burner and baffle squeeze more heat out of your dollar by causing a "scrubbing action" of the flame. The result is a baffle that becomes radiant much faster, leading to quicker recovery times and higher cooking efficiency, while still maintaining it's high efficiency combustion.

Pitco's Solstice Supreme fryer category has more gas models that achieve the Energy Star Rating than any other manufacturer. Less moving parts and no fragile ceramic burners to crack or blowers to clean means greater reliability, less required maintenance and longer life....saving you real money.

Call our sales staff today to discuss mix and match options for any Supreme Fryer to create your own custom design. Contact Spyral at 0413 703 360 or visit [www.spyral.com.au](http://www.spyral.com.au) for more information.
